

Husqvarna Aspire™ R4 Robotic Lawnmower

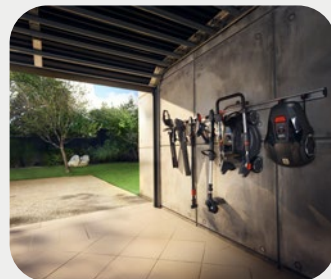

970 56 85-47 (includes installation kit)

This compact robotic mower offers a lawn cut to perfection 24/7. Optimised for lawns up to 400m² with systematic passage mowing for precisely cut narrow passages, slope handling of 25% and carefree operation thanks to reliable mowing, frost guard and weather timer. Equipped with FOTA (automatic firmware updates) and easily cleaned with a hose means effortless ownership. Complete control from your smartphone with the Automower® Connect app and smart wall storage with the included Aspire™ hooks.

Compact Performance

Compact size and low weight to improve manoeuvrability. Features innovative technologies to increase the machine's capacity and efficiency while consistently delivering great results in your garden.

Compact Storage

Adjustable, foldable, collapsible and detachable parts – for easy storage and transport. Using the tailor-made hook, you can choose to store the Aspire™ directly on the wall or wall-mounted storage rail. Rail accessory sold separately.

Weather Timer

Adjusts working time to the lawn's growth rate. It will maximize its mowing time during periods of strong grass growth. In sunny or dry weather, the mower will spend less time mowing, decreasing wear on lawn and mower.

Systematic Passage Mowing

To deliver excellent cutting results everywhere, the Aspire™ robotic mower can be set to automatically switch mowing pattern from random mode to systematic mode in narrow passages.

Smart Connections (IFTTT)

Integrate the Aspire™ Automower® even more into your smart home by using it in IFTTT applets. Connect to one of our smart connections in the Automower® Connect app, or even create your own routine with IFTTT.

Frost Guard

The robotic mower automatically interrupts the mowing schedule in frosty conditions, helping to protect the lawn.

Automatic Passage Handling

Husqvarna Automower® automatically senses narrow passages and finds its way even through the smallest passages. It will vary its route through the passage to avoid unpleasant tracks.

Easy Cleaning

You can wash the exterior and underneath of the Aspire™ robotic mower with a garden hose. By using the attached maintenance tool, the cover can easily be removed, for easy cleaning and reachability everywhere.
