

EXTOL®

Dual Wheel 260Kg/100L Electric Wheelbarrow

Item.8791590

BATTERY POWERED

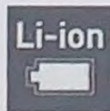

Specifications:

- ✓ Powerful 500W brushless motor gearbox & differential
- ✓ Normal or Turbo speed
- ✓ Forward, reverse or electric brake
- ✓ Thumb adjustable control panel on handle
- ✓ Off-road tyres
- ✓ 100L seamless, metal tray
- ✓ Up to 260Kg load capacity
- ✓ Foldable handles
- ✓ Removable 40V 6Ah Li ion battery with LED display
- ✓ Capacity per battery charge 3-20Km(1-5 hours)
- ✓ Battery re-charged in 2-3 hours
- ✓ Supplied complete with charger and one 40V 6Ah battery
- ✓ Weight including battery 37Kg

Controls:

The wheelbarrow has a control panel on the right handle which you can adjust with your thumb to set the direction, speed or braking. The motor can be turned off and the barrow manoeuvred manually if required.

BRUSHLESS MOTOR

Equipped with a powerful 500W electric motor these wheelbarrows can move heavy loads long distances resulting in greater efficiency and less fatigue. Put it in turbo mode and watch it effortlessly climb steep grades with a full load, no more fighting and dragging material up to where you need it.

The built-in gearbox, with a differential, improves cross-country capacity and engine performance. With the center of the load above the axis of the wheels, most of the weight is on the wheels, and the operator carries very little load.

The tyres have deep treads for firm traction.
